

# UNSW Engineering Student Opportunities Sponsorship Packages

## The Challeng Program and Women in Engineering Scholarships

Partner with us and build strong relationships to recruit the best and the brightest engineering students.

Get in touch to discuss the opportunities for your organisation. Showcased here is just a snapshot of what's on offer.

### THE Challeng PROGRAM

#### What is The Challeng program?

The Challeng Program connects our students, academics and companies in exciting, real-world project-based learning initiatives.

Students are handpicked for each Challeng and learn via a multidisciplinary team approach that mirrors working in industry. The program emphasises the development of technical and professional skills to ensure our students will hit the ground running when they start their careers.

Learn more at [challeng.unsw.edu.au](http://challeng.unsw.edu.au)

### 1. Premier Challeng Program Sponsorship

\$10,000 + GST

The Challeng Program is an exciting project-based learning initiative which connects organisations with our students and academics to solve real world projects. Learn more at [challeng.unsw.edu.au](http://challeng.unsw.edu.au)

- Networking and recruitment opportunities with high calibre students
- Opportunity to explore further collaborations with our academics
- Promote your company's employment opportunities through the Engineering student newsletter (published fortnightly to 12,000 students)
- Industry can submit a project and work with a team of students and an academic to develop a solution for the company's Challeng.
- Opportunities to deliver professional skills workshops or guest lectures for Challeng students
- Invitations to attend networking events hosted by student societies and the Engineering Faculty throughout the year
- Get involved with UNSW's Girls in Engineering Club – a community for high school students interested in STEM
- Industrial Training opportunities to recruit the best and brightest students to work at your company
- Acknowledgement of your company's support on all Challeng collateral

**Note:** All Challeng projects, workshops and guest lectures are subject to approval by the Challeng Academic Directors to ensure learning outcomes are met

# WOMEN IN ENGINEERING

Diversity in the workforce generates more ideas and stronger solutions. The WIE scholarship is aimed at (but not exclusively) low socio-economic and rural female students.

## 2. Women in Engineering (WIE) Accelerator Scholarship Package

\$10,000 + GST per year for the duration of the student/s degree

### Option A:

2 x WIE Accelerator Scholarship – \$10,000 + GST (\$5,000 for each student per year of study)

### At a glance:

- Build relationships with two high achieving scholarship recipients throughout their degree
- Provide 30 days of paid Industrial Training for each student at the award rate
- Invitations for your company's representatives to attend relationship-building opportunities with the WIE Scholarship cohort throughout the students degree
- Invitations to WIE networking events hosted by the Faculty and student society WIESoc
- Promote your company's employment opportunities through the Engineering student newsletter (published fortnightly to 12,000 students)
- The scholarship may be degree specific for a particular discipline within Engineering

### Option B:

- 1 x WIE Accelerator Scholarship \$5,000 + GST
- The Challeng Program sponsor \$5,000 + GST

### At a glance:

- 1 x WIE Accelerator Scholarship as per Option A
- Select one of the many Challeng projects that aligns with your business to partner with and build robust relationships with the academic and students within your selected team. See what's on offer
- Network with Challeng students via various professional development activities and Faculty hosted events
- Industrial Training opportunities to recruit the best and brightest students to work at your company
- Invitations to attend student society industry networking events hosted by ENGsoc and ENGIQUEERS

## 3. Women in Engineering (WIE) Scholarship

\$10,000 + GST per year for the duration of the student's degree

Support a high achieving female engineering student during their studies. Living away from home costs add up, and your assistance will make successful study easier to achieve.

### At a glance:

- Build a relationship with the scholarship recipient early on in their career. The recipient completes 30 days of Industrial Training with your company
- The 30 days is paid at the industry award rate and in addition to the scholarship. As the sponsor, you may wish to negotiate to extend the paid Industrial Training to 60 days if so desired by both parties
- Invitations for your company's representatives to attend relationship-building opportunities with the WIE Scholarship cohort throughout their degree
- Exclusive invitations to WIE networking events hosted by the Faculty and student society WIESoc
- Promote your company's employment opportunities through the Engineering student newsletter (published fortnightly to 12,000 students)
- Opportunities to participate in UNSW's Girls in Engineering Club – a community for high school students interested in pursuing STEM
- The scholarship may be degree specific for a particular discipline within Engineering
